Education

Indian Institute of Technology Roorkee   Nov 2021 – May 2025
Bachelor of Technology in Mechanical Engineering

Experience

Software Engineering Intern, Planto AI   Sept 2025 – Nov 2025
- Built an incident management system using microservices architecture with Go and PostgreSQL database
- Designed REST APIs with unit tests across services for managing incident lifecycles, schedules, and users
- Set up cron jobs to auto-assign incidents, send reminders, and integrated Slack to deliver notifications
- Built an invoice generation service in Go that dynamically creates PDF invoices using the Maroto library
- Developed secure REST APIs and integrated PostgreSQL for storing and retrieving PDF invoices

Software Engineering Intern, CodingPro   June 2025 – Aug 2025
- Built a full-stack job recruitment platform using Spring Boot and Thymeleaf
- Developed e2e recruitment workflows, profile management, job application tracking, and resume uploads
- Implemented role-based authentication with Spring Security to secure both candidate and recruiter profiles
- Containerized the application using Docker and deployed it to AWS Elastic Beanstalk with RDS for storage

Projects

git-lite   praveenk.dev/git-lite
- Created a Git client in Java that clones repositories using Git's Smart HTTP, which is simple and fast

uptime-monitor   praveenk.dev/uptime
- Built an automated uptime monitoring system in Go that continuously monitors the uptime of websites
- Integrated Slack webhook notifications via pub/sub pipeline to deliver automatic real-time downtime alerts

mini-redis   praveenk.dev/mini-redis
- Developed an in-memory Redis-style server and a CLI client in Go that supports core Redis commands
- Implemented thread-safe storage for strings (with expiry), lists (with blocking operations), and sorted sets
- Supports multiple concurrent clients and loads an existing RDB file at startup for basic persistence

caching-proxy   praveenk.dev/caching-proxy
- Built a caching reverse proxy CLI tool in Go that reduces server hits and request latency
- Developed a thread-safe, concurrent, disk-based cache storage system using SHA-256 hashing

torrent-x   praveenk.dev/torrent-X
- Created a BitTorrent client in Java that allows downloads using a single-file torrent or magnet links
- Implemented p2p protocol with tracker communication, piece verification, and metadata exchange

go-lb   praveenk.dev/go-lb
- Designed a load balancer in Go that supports concurrent request handling and active/passive health checks

Skills

Languages: Golang, Java, C++
Technologies: Git, Docker, AWS, Spring Boot, MySQL, PostgreSQL
